

AAW What's on our Minds?

Antwerp Art Weekend

18–21 May 2023

Contemporary art is the mirror we hold up to our society, where we visualize our woes and dive into the signs of our times, making a record of what moves us collectively. The exhibitions and events in this selection directly respond to, reflect on, or address societal issues, political themes, or carry a social urgency, all through different forms of art.
